

REP ACHIEVEMENTS FROM 2016/17

REP

WINS

TIMETABLING ISSUES

Multiple timetabling and admin issues have been fixed across the Faculties because of the keen eyes of our Reps! With the help of University staff, these have been remedied quickly.

LECTURE CAPTURE

Reps have been promoting lecture capture in their departments, encouraging wider usage and highlighting some of the benefits to students, including re-capping and revising from past lectures.

VENDING MACHINE

A vending machine and hot drinks machine were introduced next to the Vet School Café due to feedback from students about long queues and short breaks.

SURREYLEARN RESOURCES

Reps across all courses and departments have been working with staff to increase the level of content and the speed at which resources are uploaded to SurreyLearn.

DIGITAL FEEDBACK

Digital feedback forms have been introduced in a department in the interest of minimising paper waste and promoting sustainability. This may also be being introduced for lecture sign-up sheets.

MICROWAVES

New microwaves in the library came about as a result of a Rep raising this concern at a Rep Assembly, and the new facilities were introduced before the new academic year.

EMPLOYABILITY

Employability masterclasses were set up in Tourism Management as a result of Reps feeding back that their cohort felt they wanted more guidance with applying for jobs and interview processes.

TACKLING HIDDEN COSTS

Reps have helped to identify some of the difficulties students face regarding hidden costs of courses, and worked with the University to tackle some of the highest.

PROMOTING DIVERSITY

Diversity of authors in required reading lists has been a subject that some Reps have brought to the attention of their department, which has been recognised and looked into.

TASTER LECTURES

Students have promoted the idea of taster lectures for modules so that they are more informed when choosing modules. These have helped reduce confusion or dissatisfaction.
